

WEST NOW HELD IN GRIP WORST STORM IN YEARS

Freezing Temperature Prevails at Several Points in Southern California; Fear for Safety of Orange Crop

LOS ANGELES, Jan. 6.—Thousands of men were out tonight adding their ingenuity against the cold weather in an effort to avert from further damage and other signs of the strange belt ice formed so thickly as to render skating so dangerous that children were able to attempt "skateless" skating.

southern California's orange and lemon crop, which was valued at nearly

Outlets at Prices in 25 Years

SAN FRANCISCO (UPI)—The U.S. Postal Service is expected to announce a major rate increase for its newspaper delivery service in the next few months, but the move is expected to be offset by a reduction in the number of newspapers delivered to homes.

The Postal Service is expected to announce that the rate for the delivery of newspapers to homes will be increased by 10 percent, but the number of newspapers delivered to homes will be reduced by 10 percent.

The Postal Service is expected to announce that the rate for the delivery of newspapers to homes will be increased by 10 percent, but the number of newspapers delivered to homes will be reduced by 10 percent.

light, with temperature as low as, or lower than, those which last night shattered the record for 50 years.

Within a radius of 12 miles of Los Angeles the wind whirled up clouds of dust, lifting all the loose material, especially all of the important orange and lemon growing seedlings, and blew away the thousands smoldered or blazed, emitting dense clouds of smoke which San Francisco's residents could see from across The bay. The temperature here dropped above zero at midnight, the lowest recorded since January 1891, when it fell just below freezing.

Then, the lake was frozen over, and the frozen water reflected the light of the sun, which shone brightly on the mountains. The

It was hoped would raise the temperature within the orchards and groves sufficiently to prevent further freezing or frost on the trees.

Various Systems Used.

All sorts of smudging systems were employed. In places crude oil was used to rail thick clouds of black, pungent smoke among the orange and lemon-blossom trees. In other sections blazing distillate burners drove the clouds and valleys rapidly illuminated.

These smudging operations were in progress all of last night and today, and will be continued until the present cold wave abates. Then it will be possible to estimate the damage done to the orchards. The orchards are winter vegetables and the orchards of walnut and deciduous fruit trees which

According to the sales managers of various growers' associations, hardly more than a tenth of the orange crop has been shipped out. The remainder, they assert, will show serious losses.

Traffic Demoralized.

Suburban trolley lines were more or less demoralized today through the freezing of air-brake valves. Water was poured on the rails to melt the ice, but a household was forced to call the fire department, because his garden hose had frozen and could not be used to extinguish a kitchen fire that threatened to damage his home.

Long telegrams and fire rings were observed in Pasadena and Inglewood, and Los Angeles.

Early tonight the mercury was 6 degrees above and rapidly falling, and it is feared that the city water supply will be cut off entirely. This morning the lowest temperature was zero, the lowest since 1913.

Extensive ice is reported from parts of Utah and Idaho.

Situation Is Critical.

Water department officials announced that the situation is critical.

**RECORD FOR CONTINUOUS
COLD WEATHER IS BROKEN**

All records for continuous and steady snow loading were broken in Colorado Springs yesterday when the thermometer registered below zero for the entire day and gave promise of remaining below the mark for at least 48 hours.

zero yesterday morning at 5 o'clock the quakes did recorded since 1888 and one of the three centennials in the history of the city.

At an early hour this morning

WHAT OF CONSPIRACY

CAPITAL, ASKS GOMPERS

Government by Injunction Is Responsible for Dynamite Outrages, He Declares

WASHINGTON, D. C., Jan. 5.—Samuel Gompers, president of the American Federation of Labor, speaking to-

sanized capital—the conspiracy to murder the liberties of the toilers in fear from them the means of protection by which they have bettered their

day before the Senate Judiciary Committee in favor of the Clanton bill. The bill, which would amend the Espionage and Contempt bills, gave answers to critics. It aimed at the organization which he heads because of the trial and conviction, for dynamiting of officers of the structural condition, to lead them bare and defenceless in the comparative struggle for the common good. He would not dastardly to incur some odium? Should the conspirators, with their hands stained with life blood of men's ambition, happiness, liberty, be accorded

Iron Workers union: "If even the three shall come said, Sir, completely aware of his address, the government by dynamic shall be attempted (and let us hope and work that it never shall come) it will have as its main aim to destroy the rights of the citizen based on government by injunction—personal government foisted upon people instead of government by the people. Should they be allowed to continue to manipulate the powers of the State by addressing the courts in justice unto the oppressed and the burden intolerable to seek social justice, the people will rise and the judges presided at the trial realized one of the main aims of the government by lawless, autocratic irresponsible exercise of governmental authority was destroyed."

In closing his statement, which included an assault on employers' organizations, Gompers declared that the United States Steel corporation and the National Erectors association, Mr. Gompers declared that organized labor would not repudiate the structural iron workers unions' "no leave, no helplessness and at the mercy of management" slogan.

the federal government to finance them. Although the committee, of which the government is a member, is authorized to make recommendations, the government is not obliged to accept them. The committee's report is to be referred to government by a majority vote.

The North's policy has been changed upon one of the issues that had failed to realize capital relationship. The North is to have the right of a conditional preference for its goods in the South's market. Life just is immutable as the law of gravitation, of attraction and repulsion, of life which needs a fix.

PEOPLE ARE URGED TO FEED STARVING BIRDS

It was reported yesterday that hundreds of birds were freezing to death in Colorado Springs and vicinity. Numbers have been found dead on the sidewalks, where they have fallen from trees. Bird lovers are urging that food be placed where the birds can find it. This will save many from starving to death during the next few days. Millet, corn meal, bread crumbs or flour may be used. Game Officer Reynolds yesterday issued a general order that horses must be kept hitched and must be blanketed when left standing on the streets.

WATER LEVEL LOWERED MORE THAN 230 FEET

A fall ranging from 209 to 243 feet in the water level in the mines of the Cripple Creek district, since the opening of the tunnel, was reported by Engineer T. R. Connerman in his monthly statement received by the officers of the tunnel company here yesterday. The flow from the tunnel January 2 was 8,453 gallons and the water stood in the Gold Coin shaft at an altitude of 8,424 feet. The fall during the month of December was 30 feet, a total of 218 feet since the tunnel was driven. The fall in the Elkton was 11 feet from November 28 to December 26, with a total subsidence of 242 feet. The average fall in the Battle Mountain district has been 20 to 30 feet more.

PROF. G. H. PALMER WILL BE AT COLLEGE FEB. 1

Prof. George Herbert Palmer, head of the department of philosophy at Harvard university, and one of the most noted educators in his department in the world, will arrive at Colorado College, February 1, for a number of lectures at the local institution for a month. Professor Palmer is the Harvard representative in the exchange of professors this year. Colorado college, being one of the five institutions in the country that have the arrangement with Harvard.

Prof. G. H. Palmer of the department of mathematics at Colorado college will leave here February 1 for Cambridge where he will represent the local institution for the entire semester. Professor Palmer will devote his time to original research work in mathematics.

Professor Palmer will give two courses at Colorado college, one in ethics and one in English poetry. Arrangements for the schedule are now being made at the college and a large majority of the students are planning to enroll under the noted man. There will be special lectures courses to which townpeople will be admitted and a number of addresses will be made.

Last spring Prof. Albert Bushnell Hart, dean of American historians, represented Harvard at the college. He had several classes on special historical and biographical subjects, and his work met with enthusiastic approval on the part of the students as well as the residents of the city who crowded his lecture rooms. Last year Prof. E. C. Hills, head of the Romance language department, was at Harvard.

Paul Holland and Miss Grace Kilpatrick Wed

Paul Holland of this city, district manager of the Mountain States Telephone and Telegraph company, and Miss Grace Kilpatrick of Cripple Creek, were married in Kansas City yesterday morning. They will remain in the east for a month before returning to Colorado Springs, where they will make their home.

Miss Kilpatrick is the daughter of Mr. and Mrs. D. W. Kilpatrick, and formerly lived here, where she attended high school. She has held the position of supervisor of music in the Cripple Creek schools during the last year.

"THE LITTLEST REBEL" PLEASES BIG AUDIENCE

"The Littlest Rebel," a drama of the Civil war, presented by Dustin Farnum with a strong supporting cast, pleased a large audience at the Grand Opera house last night. The production was well staged.

Dustin Farnum as Lieutenant Colonel Morrison of the United States cavalry, who sacrifices section at prejudice, almost shadowing loyalty, in response to the appeal of the love of a Confederate captain for his little child, scored heavily with his excellent interpretation of a difficult role.

The child, Virginia, was a character most capable portrayed by Helen Thebus. Her father, Capt. Herbert Carr, a Confederate agent, was a part strongly presented by Alexis R. Luce.

George Thatcher, as Uncle Billy, a slave, gave an excellent characterization of the old southern negro. Eva Scott, as Sally Ann, a nurse, was competent as were others in the cast.

DAVIS AND WELLS ARE BROUGHT HERE FOR TRIAL

Arthur Davis and Fred Wells, colored, arrested in Pueblo upon charges from the Colorado Springs police, were brought here last night by Detective Tom Gavin. Wells is believed to be the man who stole a watch valued at \$35 from Alfred Bryson, at 24 South Tejon street, last Wednesday. Wells' connection with the robbery was traced by a small brass check which was in the money drawer that was robbed. The check was found, later, outside the door of the house occupied by Wells. Davis is accused of the theft of a brass check from a Mountain woman. Information against the pair was given by Justice Dunnington.

GET A TEN CENT BOX OF CASCARIS.

Insures you for months against a Sick Headache, Biliousness, Constipation or a Bad Stomach.

Put aside that "Old Time Salt" Cathartic Pills, those vile purgative waters which force a passage through the bowels, but do not thoroughly cleanse, loosen and purify these drainage or alimentary organs, and have up clean whatever upon the liver and stomach.

Keep your insides organs pure and fresh with Cascaris, which they might desire to stomach remove the undigested food and fermenting food and foul gases, take the waste from the liver and carry out of the system all the accumulated waste matter and poisons in the intestines and bowels.

A Cascaris tablet will make you feel great by morning. They work while you sleep, move a box, taken and cost only 10 cents a box from your druggist. Millions of men and women take a Cascaris now and then and never have headache, biliousness, coated tongue, indigestion, sour stomach or constipated bowels. Cascaris belongs to every household. Children just love to take them.

JOHN J. KNOX, PROMINENT IN CLUB CIRCLES, DEAD

John J. Knox, 78 years old, son of the former controller of currency, and a prominent citizen of this city, died suddenly from an attack of pneumonia at his home, 114 West Del Norte street yesterday morning. He had lived in Colorado Springs for the last six years and came here for the benefit of his health. He is survived by his wife and three small daughters, Florence, Grace and Carol.

Mr. and Mrs. Knox have been prominent in the social life of the city. Mr. Knox was at one time a track, tennis player and for the last several years had been club referee at the Cheyenne Mountain Country club, of which he was a member and chairman of the tennis committee. He was also a member of the El Paso club.

He was the son of the late John J. Knox, a prominent financier, who was the author of the bill known as the coinage act of 1873. In 1873 the latter was made controller of the currency, from which position he resigned in 1884 to become president of the National Bank of the Republic of New York city.

Mrs. Florence Knox is the daughter of Mrs. Niles of New York city. No arrangements for the funeral have been made, pending word from relatives in the east.

PHILIP ROHMAN DIES

Philip Rohman, who had been a resident of this city for the last 18 years, died at 5 o'clock yesterday afternoon at his home, 103 Cheyenne boulevard, after an illness of seven months. His death was caused by a complication of diseases, superinduced by old age.

Mr. Rohman was 87 years old, and he and Mrs. Rohman, who survives him, had been married 65 years. He was born October 25, 1825, in Bavaria, Germany. Mrs. Rohman is 80 years old. Mr. Rohman came to this country when he was 21 years old, and settled first at Peoria, Ill. Later he moved to Nebraska, and then came here. He engaged in farming until his retirement 20 years ago.

Besides Mrs. Rohman, their eight children are still living. Three of them, Mrs. W. C. Stark, Mrs. C. B. Miles and Miss Mary Rohman, live in Colorado Springs. The other children are P. H. Rohman of Lincoln, Neb.; Peter Rohman of Valparaiso, Neb.; Frank Rohman, who lives in Kansas; Fred Rohman of Oklahoma; and Mrs. Crayelle Rohman of Fort Dodge, Ia. The funeral probably will be held from St. Mary's church.

DON'T KNOW THEY HAVE APPENDICITIS

Many Colorado Springs people who have chronic appendicitis, which is not very painful, have doctors for years for gas in the stomach, sour stomach or constipation. The Colorado Springs Drug Co. states if these people will try simple buckthorn bark, glycerine, etc., as compounded in Adler's-ka, the German appendicitis remedy, they will be surprised at the QUICK benefit. A SINGLE DOSE relieves these troubles INSTANTLY.

MRS. HARRIET MADDEN A VICTIM OF PERITONITIS

Mrs. Harriet Madden, wife of Dr. C. H. Madden, died at 10 o'clock yesterday afternoon after a brief illness. She was 64 years old and had been ill for several days.

Mrs. Madden was a native of New York and had been in Colorado Springs for many years. She was a member of the Methodist church and was well known in the community.

Mrs. Madden was born in New York city and was the daughter of Mr. and Mrs. John Madden. She was married to Dr. C. H. Madden in 1870.

Mrs. Madden was a devoted wife and mother and was well known in the community. She was a member of the Methodist church and was well known in the community.

M. C. GILE GIVES DINNER FOR CHAS. P. BENNETT

Prof. M. C. Gile, a master of the First Baptist church, was host yesterday at a luncheon given at the Axtell hotel in honor of Chas. P. Bennett, who has been in the city for the last seven years. The dinner was given for the pastor, the Rev. James H. Spencer, and for the trustees, T. J. Fisher, J. P. Rose, W. D. Kinney, Dr. G. W. P. C. E. Emory, Chas. B. Bennett and Prof. M. C. Gile.

E. L. BARBEE ILL

E. L. Barbree, patrol driver for the police department, is seriously ill at his home, 415 West Main street. It was feared for several days that pneumonia might develop.

IMMIGRATION
XXIX—PAST HUMAN MIGRATIONS
By Frederic J. Haskin.

(Continued from Page Four.)

post of Pope Gregory when he revisited it. But certain it is that the ruins of Milla, of Faleque, of Quikrua, of Yutan, of Oasas Grande, and of the Incas, tell of races which in their day could match their best contemporaries of Asia, Europe and Africa.

That the emigrants who laid the foundations of these civilizations came from across the seas seems certain. We see the Polynesians migrating across the barren plains, which stretch at most from the Rio Grande to the vale of Anhuah. Then they disappear, legend says, through the ravages of pulque, and after them comes the Cincinaca-Mongolian in features, Chinese in the forms of their civilization. Even to this day we may read on the pyramid of the sun, believed to have been erected by them, the same inscription one most often finds upon the ancient tombs of China—"longevity."

When they came on here, there is nothing but circumstantial evidence to indicate, but it seems probable from that evidence that it was by a continuation of the eastward movement of humanity that began when the Turanians settled in the valley of the Yellow river and founded the great empire of China.

Throughout hundreds of generations humanity has been migrating here and there in search of the promised lands of better opportunities, nearer always migrating and necessities and hardships, and often at the risk of life itself. Sometimes it has been the hand of oppression and tyranny that has given impetus to the tide; at other times it has been the promise of a better life, a better future, a better world.

Tomorrow: IMMIGRATION
XXX—Future Human Migrations.

TO FOLLOW ART STUDIES IN PARIS

(Mrs. Harry Payne Whitney of New York) That Mr. and Mrs. Harry Payne Whitney have just completed the purchase of Monclaire Robinson's beautiful home in Paris is the story that is circulating among the friends of the Whitneys. Further details as to why the Whitneys wanted the house and why Mr. Robinson was willing to sell are not forthcoming, but it is generally understood that the Whitneys have decided to spend the winter of 1913-14 in Paris.

Cripple Creek Mines

INSTALL COMPRESSOR ON JEFFERSON CLAIM

CRIPPLE CREEK, Jan. 6.—A new three-horsepower electric compressor has been installed on the Jefferson claim on Gold hill for Levees, Russell & Morgan. They have recently started up this property, and it is said they have a good prospect. It was only a week ago that a hoist was put on the shaft and all arrangements have been made to carry out an extensive plan of development work.

The Gold hill section has recently returned to prominence since several new leases have been started up. One of the best leases on Gold hill is that operated by the Vetter brothers and the Hahenwalds on the Abie family mine, from which they are shipping a good grade of ore.

CRESSON DEVELOPING THIRTEENTH LEVEL

CRIPPLE CREEK, Jan. 6.—The sinking of the Cresson shaft has about been completed to the thirteenth level and within a week or so it is understood, laterals will be started to open the main vein, which has proved one of the largest ore shoots ever opened in this camp.

To prove the ore a winze has been sunk from the level, but just what the Cresson company has learned, since the affairs of the Cresson company are kept under cover and kept to themselves.

However, there is every reason to believe that things turned out as expected, for the reason that the shaft was sunk.

In the meantime, the production from the Cresson mine amounts to about 1,000 tons of ore, which will be shipped in the neighborhood of \$30 a ton. The net profits to the company, it can be seen, are not small.

Miners when talking mines of the Cresson mine have been reduced to the minimum, and the greater amount of work is expected for the year just closed.

MONTROSE LEASERS OPEN NEW SHOOT

CRIPPLE CREEK, Jan. 6.—A new and important ore discovery, the details of which are lacking, has been made on the fourth or bottom level of the Montrose shaft, which is owned by the United Gold Mines company in partnership with other concerns. The strike was made by Martin & Walker, who have the lease.

SHIPPING REGULARLY FROM THE VINDICATOR

CRIPPLE CREEK, Jan. 6.—Millington & Co., operating a lease on the Vindicator shaft No. 2, are shipping regularly, and it is expected that the present output will be continued for some time to come.

KOHLMAN GETS PART OF LEASE ON MARY NEVIN

CRIPPLE CREEK, Jan. 6.—Another block of the Mary Nevin not leased to John Kohlman, who has the north block of the claim, and he has ordered a 1-horsepower electric hoist put on the shaft just as soon as it is installed, operations will start, and this could be in a few days. It is said that the Mary Nevin vein, which runs through the top of the hill, will be sought, as it is believed a large body of ore will then be developed.

PUT NIGHT SHIFT ON EMMA NO. 2 SHAFT

CRIPPLE CREEK, Jan. 6.—Kohlman & Co., operating the Emma No. 2 shaft of the Buchanan estate, have put a night shift to work on the sinking of the shaft, which work they have just started.

That shaft is 120 feet deep and will be put down to a depth of 200 feet. It is believed that the ore which they have struck out above the 130-foot level will continue to go down, as it appears the vein is widening.

STRIKE GOOD GRADE ORE ON VINDICATOR NO. 2

CRIPPLE CREEK, Jan. 6.—A new and rich body of ore has been opened on the eighth level of the Vindicator No. 2 shaft by Levees and Morgan. The ore is said to be from two to three feet wide and the values are uniform across that distance. The strike was made north of the shaft, and it is said that the vein has not been opened in any other part of the mine.

CONTINUE PROSPECTING IN SQUAW MOUNTAIN

CRIPPLE CREEK, Jan. 6.—Prospecting continues in the Squaw Mountain mine on the hill at that name, the operations being directed by Mr. C. W. Jones, who represents a concern of Springfield, Mass., which company has just become interested in the district following the revival of interest in the local mines.

At a depth of 100 feet, crosscutting and drifting is being done without special results, so far.

HECKLER TAKES LEASE ON THE PAUPER CLAIM

CRIPPLE CREEK, Jan. 6.—Heckler & Co. have taken a lease on the Pauper claim, which is located just south of the South Burns mine and east of the Flindley property on Bull hill. The shaft is 200 feet deep. It is said that the leasers have some ore already opened which they will start in shipping.

SHIP THREE CARS A WEEK FROM BLOCK 239

CRIPPLE CREEK, Jan. 6.—The present output from block 239 of the Star mine, located on Bull hill, which is operated by Perrie & Co., is about three cars a week of good ore shipped from the main vein, which has been developed in the course of sinking the shaft. They have a good deal of ore in sight and probably will keep up the present production for some time to come.

NEW YORK MARKET

NEW YORK, Jan. 6.—Quotations moved in an uncertain way on the stock exchange today, and speculative sentiment was confined to the few active members of the board of trade today. The tone of the market was firm in the early part of the day, but the support of the market was the Union Pacific stock, which had a depressing effect on the rest of the market. The Union Pacific stock was the feature of the day's dealings. In the forepart of the session it was the strongest of the favorite stocks, with leading and Northern Pacific showing considerable strength.

When word came of the Union Pacific stock, the market once more slumped quickly, falling more than 4 points below the high price of the day. Stocks were sold more heavily, and the low prices of the session were reached. Southern Pacific declined with Union Pacific, showing a 2-point loss. Steel sagged to a point below yesterday's close, but among the majority of standard stocks, net changes at the close were comparatively small.

Further weakness developed among specialties, which have been depressed recently, such as the Petroleum shares and Beer Suggs.

In the bond market there was an undercurrent of firmness. Total sales in value, \$4,500,000.

United States bonds were unchanged on call.

Quotations furnished by Oils & Co.
